

### PS10 Magnetic Powder Pick-up Sticks

- PS10 12" Magnetic Powder Pick-up Stick
- PS10-1 36" Magnetic Powder Pick-up Stick

The **Pick-up Stick** consists of a powerful magnet on a slide within a plastic housing. Simply wave the stick over the area to be cleaned and the particles will attach themselves to the tip of the stick. Excellent for cleaning up after magnetic inspections and ferrous grinding operations. When the stick is fully loaded with the used material, position the stick over a collection container and pull out the slide. Easy as one-two-three!
